PROJECT

URL Shortner

- A URL shortener is a web service that take a long, complex URL (Uniform Resource Locator) and convert it into a shortener, more manageable URL.
- The Primary purpose of URL shorteners is to make links more user-friendly, especially for sharing on social media, in text messages, or in situations where space is limited.
- We have built this web based application using HTML, CSS, Express.js, ejs engine(middleware), MongoDB

Cloud NoteBook

- Store the notes on the cloud and we can access from anywhere.
- We have built this web based application using Bootstrap, Express.js, MongoDB, React.js

Edusity Website

- The Edusity website is a online education site for student.
- We have build this web page using HTML5, CSS3, JavaScript and it is hosted on the server.
- <https://edusitydg9.netlify.app/>
